Summary ₋

Full-Stack Developer with strong expertise in the MERN stack and modern web development. Specialized in creating visually stunning and accessible web applications that prioritize high availability and scalability. Committed to lifelong learning and embracing new challenges, seeking continuous growth and improvement.

Technical Skills _____

- Languages: JavaScript, TypeScript, MongoDB, HTML, (S)CSS
- Libraries & Frameworks: Node.js, Express, React, NextJS 14, TailwindCSS
- Microservices: Docker, Kubernetes, Redis, Helm
- Tools & Platforms: Git, Jest, Github Actions, Netlify, Render, Vercel, AWS, Firebase
- Design & Prototyping: Figma, Photoshop, Blender
- Concepts: Clean Architecture, MVC Architecture, SOLID Principles

Experience _____

Project-Based Software Development Trainee

- Mentor Bro April 2025 - Present
- Built and deployed full-stack web applications using the **MERN** stack (MongoDB, Express.js, React.js, Node.js)
- Contributed as a backend developer on the **Kooli App** project, focused on scalable and secure backend architecture
- Designed and implemented **RESTful APIs** using Node.js and Express for efficient and secure communication
- Developed and optimized MongoDB schemas and queries to reduce latency and improve data access
- Integrated third-party services including payment gateways and cloud storage
- Implemented authentication and role-based access control using JWT and middleware

Projects _____

Multi-Role E-Commerce Platform | MongoDB, Express.js, React.js, Node.js, Tailwind

Designed and developed a full-stack, production-grade e-commerce platform using the MERN stack, featuring role-based access control for Users, Merchants, Delivery Personnel, and Super Admin. Implemented a clean MVC architecture, built robust RESTful APIs.

- Authentication: OTP-based signup and password reset via email, secured login using **JWT** and **Express Session**, password hashing with **Bcrypt**.
- **User Panel:** Dynamic slider and category sections managed by Super Admin, complete profile and address management, dynamic wishlist and cart, autoapplied coupon system, seamless Razorpay payment integration, real-time order tracking with cancel/return flows, and downloadable PDF invoices.
- **Product Discovery:** Fully-featured product page with **dynamic** search, categorybased filtering, price and sorting functionality. Implemented a responsive

Live 🗹 | GitHub 🖸

layout with a **dark/light** theme toggle to enhance **UX** and accessibility across devices.

- Merchant Panel: Role-based access to product management with full CRUD operations, image upload and preview via Multer, stock level monitoring, category assignment, personalized order history, and product performance analytics.
- Super Admin Panel: Centralized management of users, merchants, delivery personnel, product categories, sliders. Coupon creation with auto-apply logic based on purchase threshold. Access to full platform-wide analytics and invoice export.
- Delivery Panel: Dedicated dashboard to update order status (e.g., shipped, delivered), view delivery address and customer contact info, and mark cash collected to admin.
- Analytics Reporting: Real-time dashboards for revenue (total income, AOV, conversion rate), product trends, user activity graphs, and filterable reports by date range, downloadable sales and invoice reports.

Mini Projects _

SEO-Optimized Blog App | Next.js, MongoDB, Tailwind CSS Built a blog platform using **Next.js** with **Server-Side Rendering (SSR)** for enhanced SEO and performance. Designed without UI libraries to focus on core concepts and custom styling.

Live 🗹 | GitHub 🗹

Live ☑ | GitHub ☑

- Implemented file-based dynamic routing and custom meta tags
- · Applied responsive design with Tailwind CSS
- Emphasized SEO fundamentals with semantic HTML structure

Invoice Generator App | Next.js, Tailwind CSS

Created a responsive invoice tool with dynamic forms and client-side PDF generation. Focused on interactivity, clean UI, and modular component structure.

- Added/removable items with live subtotal and tax calculations
- Auto-generates invoice numbers and dates
- Exports invoices as downloadable PDFs directly from the browser

Real-Time Chat App | React.js, Node.js, Express, Socket.IO Built a real-time chat application with user login, group messaging, and dynamic UI updates. Designed for responsive layout and scalable state management.

- Implemented real-time messaging using **Socket.IO** for instant communication
- Created modular React components for login, groups, chat UI, and message views
- Managed global app state (theme, sidebar updates) using Redux
- Built RESTful backend with Express and integrated WebSocket events for chat flow
